MAINE LEAD PAINT HAZARD ABATEMENT PROGRAM

PROJECT COVER SHEET

INSTRUCTIONS: Complete this Cover Sheet and the forms contained in this Bundle will auto-populate. Adobe's bookmark feature provides users with access to each form contained in the Bundle. The Cover Sheet does not contain all the fields needed to completely populate forms. Review the forms, provide missing data and then print completed documents for signature(s). Forms not contained in the Bundle can be downloaded from the CAA Portal.

MAINE LEAD PAINT HAZARD ABATEMENT PROGRAM (N261)

LETTER OF LEAD HAZARD REDUCTION COMPLIANCE

DATE:

TO:

ADDRESS:

Dear Owner:

This letter is to certify that I inspected your property at _____
Apartment No . _____ relevant common areas and exterior areas in
_____ Maine for lead hazard reduction compliance on _____ and on that
date those surfaces treated as specified in the Design Plan dated _____ were found to
be corrected and in compliance with HUD Guidelines and State of Maine Department of Environmental Protection
criteria for clearance. A post hazard control work visual inspection and dust wipe samples were taken and found
to be below these clearance criteria.

HUD Guidelines and State of Maine DEP Lead Management Rules do not require full abatement of lead-
containing components within a dwelling. In many instances, interim controls will be used to mitigate lead paint
hazards. This means that lead-based paint remains in your home and you should bear this in mind if you decide
to perform any additional rehab to your home. Those components/surfaces/areas specified in the Design Plan
will be corrected under MaineHousing's Maine Lead Paint Hazard Abatement Program. A report detailing the
sample results in conjunction with this Letter of Compliance are evidence that the work has been completed.

Sincerely,

Lead Inspector
Inspector # _____

DISCLAIMER: THIS LETTER OF LEAD HAZARD CONTROL COMPLIANCE DOCUMENTS THAT THE LEAD
HAZARD CONTROL WORK OUTLINED IN THE LEAD HAZARD CONTROL CONSTRUCTION CONTRACT AS
WELL AS CLEARANCE SAMPLING HAVE BEEN PERFORMED, MEETING CLEARANCE LEVELS
ESTABLISHED IN THE HUD GUIDELINES.

THIS LETTER **DOES NOT CONSTITUTE A LEAD-SAFE STATUS CERTIFICATE** AS DEFINED IN THE MAINE
DEP LEAD MANAGEMENT REGULATIONS.

MAINE LEAD PAINT HAZARD ABATEMENT PROGRAM

Required Essential Maintenance Practices Plan for Maine Lead Paint Hazard Abatement Projects using Paint Plus Essential Maintenance Plan (“Paint Plus”) to Eliminate Lead Hazards

APPLICANT (OWNER):

CO-APPLICANT (CO-OWNER):

Entity or Owner First Name MI Last Name

Entity or Owner First Name MI Last Name

PROPERTY:

COMMUNITY ACTION AGENCY (CAA):

Property Street

CAA Name

Property City Property State Property Zip

LEAD IINSPECTOR:

Name: _____

CONTRACTOR:

Phone: _____

Contractor Name

Email: _____

Residential Unit: _____

Overview

Paint Plus Essential Maintenance Plan (“Paint Plus”) is an interim (short-term) method used by lead contractors and property owners to temporarily eliminate lead hazards. Interim controls are achieved through the removal of any chipping, cracking, and flaking paint plus the application of a new protective coating of paint in conjunction with the implementation of a written essential maintenance plan. This method cannot be used on impact or friction surfaces (e.g. floors, stair treads/risers, thresh holds, window sashes, parting beads, stops, window wells, doorjamb and edges).

Essential Maintenance Plan

An Essential Maintenance Plan is a written and implemented plan of paint inspection and maintenance that ensures that the paint remains in good condition and that the surface is not creating a lead hazard. The building owner must carry out Essential Maintenance Practices six months from the initial application of the paint and annually thereafter, whenever occupancy changes and immediately after the occurrence of unexpected events which cause deterioration of the painted surfaces.

Enclosed you will find an inventory of the building components that you will need to inspect and several forms that will assist you in documenting your Essential Maintenance Plan-related activities. Also enclosed you will find the “Essential Maintenance for a Lead-Safe Home” brochure. Please make sure you read this brochure; it provides information you need to implement Essential Maintenance Practices.

Elements of the Essential Maintenance Plan

The Essential Maintenance Plan has 4 parts: an inventory of painted surfaces that need routine inspection and maintenance; a schedule and protocol for routine visual inspections; forms for documenting routine inspections and essential maintenance performed; and the booklet “Essential Maintenance for a Lead-Safe Home” that describes how to perform essential maintenance.

“Paint Plus” Building Component Inventory

The “Paint Plus” Building Component Inventory Form contains a list of all building components within your dwelling unit where paint plus essential maintenance practices was used by the contractor. It is organized first by Room Name, and then lists Building Component and Location in the Room. These are the specific building components that must be visually inspected and properly maintained.

UNIT _____

Scheduled Visual Inspections of Building Components

Each of the building components listed on the “**Paint Plus**” **Building Component Inventory Form** must be visually inspected six months from the initial application of the paint and annually thereafter, whenever occupancy changes and immediately after the occurrence of unexpected events which cause deterioration of the painted surfaces. You must do this visual inspection to document that the condition of the paint remains intact.

How to do a visual inspection

When performing your inspection, check each building component for signs of:

- Flaking paint
- Peeling paint
- Cracking paint
- Paint chips
- Dust on window sills
- Dust on the floor

If the building component is damaged and/or needs repair, follow the **Safe Work Practices** referred to in the enclosed brochure, “**Essential Maintenance for a Lead-Safe Home**”.

What to do after your visual inspection

After completing the routine visual inspection, fill in the enclosed form, “**Visual Inspection Form**” to document that you have done your visual inspection(s). Save this form with your Essential Maintenance Practices Plan.

Documenting Essential Maintenance Practices Plan Requirements

Included are forms used to record your Essential Maintenance Practice-related activities. It includes a signature sheet that is to be used to document that you have read and understand the Essential Maintenance Practices Plan requirements.

Forms/Signature Sheet:

- Understanding the Requirements of the Essential Maintenance Practices Plan Signature Sheet;
- Paint Plus Building Component Inventory Form;
- Visual Inspection Form; and
- Essential Maintenance for a Lead-Safe Home brochure.

Understanding the Requirements of the Essential Maintenance Practices Plan

I/We have read and understand the requirements of the Essential Maintenance Practices Plan, and agree to maintain this facility in accordance with the developed Essential Maintenance Practices Plan.

Visual Inspection Form and Essential Maintenance Record

This form is used to document your visual inspections and essential maintenance actions conducted six months from the initial application of the paint and annually thereafter, whenever occupancy changes and immediately after the occurrence of unexpected events which cause deterioration of the painted surfaces. This helps ensure that the paint on these building components remains in good condition and that the surfaces are not creating lead hazards.
