

Appendix L

HUD Build America, Buy America Construction Material Spreadsheet

Products covered under the Buy America Preference

Project Name:				
Project Location:				
MaineHousing Loan #:				
Date:				
	Product Classification	on		
	Iron and Steel			
Items that consist completely or predominately or iron, steel, or a combination of both. "Predominantly" means the cost of the iron and steel content exceeds 50% of the total cost of all the item's components.				
All manufacturing processes, starting from the initial melting stage and continuing through the application of coatings, must occur in the United States.				United States.
		Are materials produced in the U.S. sufficient and reasonably available quantities or of a satisfactory quality? (if no, see note below ***)	Cost	
			Produced in US	Foreign Produced

		Iron and Steel Totals	\$ -	

Construction Materials

Construction Materials are divided into two categories: Specifically Listed Construction Materials and Not-Listed Construction Materials. All manufacturing processes for the construction material must occur in the United States. Minor additions of materials, supplies, or binding agents to a construction material (such as the binding agent used in engineered wood) do not change the categorization of the construction material.

Specifically Listed Construction Materials

Specifically Listed Construction Materials include (a) non-ferrous metals; (b) lumber; and (c) plastic-and polymer-based composite building materials, pipe, and tube.

			Cost	
Item Description	Type of Certification Attached (either documentation evidencing products are "Made in America" and/or the "Made in America" label	Are materials produced in the U.S. sufficient and reasonably available quantities or of a satisfactory	Produced in US	Foreign Produced
			*	
	Specifically Listed Co	nstruction Materials Total	\$ -	

Non-Listed Construction Materials				
Not-Listed Construction Materials include (a) all other plastic- and polymer-based materials (such as polymers used in fiber optic cables); (b) glass; (c) fiber optic cable; (d) optical fiber); (e) engineered wood; and (f) drywall.				
			Cost	
Item Description	Type of Certification Attached (either documentation evidencing products are "Made in America" and/or the "Made in America" label	Are materials produced in the U.S. sufficient and reasonably available quantities or of a satisfactory quality? (if no, see note below ***)	Produced in US	Foreign Produced

	Not-Listed Co	nstruction Materials Total	\$ -	

Manufactured Products

Manufactured Products include articles, materials, or supplies that have either been (a) processed into a specific form or shape; or (b) combined with other articles, materials, or supplies. A manufactured product may include components that are construction materials or iron and steel products, unless the manufactured product also meets the definition of iron or steel or construction materials. In such instances the product should be reclassified into the appropriate category.

Manufactured products must meet two production requirements: (a) the final product must be manufactured in the United States **AND** (b) at least 55% of the cost of the components making up the manufactured product must be associated with componenets that were mined, produced, or manufactured in the United States.

TOTALS

Project Construction Costs 7	l'otals \$ - \$ -				
Total Project Costs (including hard and soft	costs)				
Yes No Will the inclusion of U.S. produced products and materials increase the cost of the overall project by more than 25%? Image: Comparison of U.S. produced products and materials increase the cost of the overall project by more than 25%?					
***When types of iron or steel, manufactured products or construction materials are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality, the developer must submit documentation proving this to be true.					
Materials annd Activities not covered by BAP					
1. Temporary products and materials that are removed at or before project completion, such as temporary scaffolding, equipment or tools. 2. Equipment and furnishings such as movable chairs, desks, and portable computer equiment, that are used at or within the finished project but are not an integral part of or permanently affixed to the structure. 3. Technical assistance and management costs. 4. Design and planning costs, project scoping, or advance assistance.					
projects where there are no articles, materials or supplies that are incorporated into the project.
