MaineHousing Mission Statement

The mission of MaineHousing is to assist Maine people in obtaining and maintaining quality affordable housing and services suitable to their housing needs.

Supportive Housing Program (SHP) 2024 Request for Proposals (RFP)

A. Overview

MaineHousing is making up to \$10,391,976 of funding available under this RFP for qualified developers to create permanent supportive rental housing for people experiencing, or at risk of experiencing, homelessness. Permanent supportive housing includes housing for those in need of on-site services. MaineHousing is also making available Section 8 Project Based Vouchers (PBVs) from its Housing Choice Voucher Program to be used in conjunction with SHP funds.

Section 3205 of the American Rescue Plan Act of 2021 (P.L. 117-2) established HOME-ARP to assist people experiencing, or at risk of experiencing, homelessness. Of the \$10,391,976 in total SHP funding, \$7,391,976 will come from HOME-ARP funds and the remainder will come from State funds. Awards under this RFP, or any subsequent RFP, must comply with MaineHousing's HOME-ARP Allocation Plan as amended and approved by the United States Department of Housing and Urban Development (HUD) as well as the HOME-ARP implementing guidance.

MaineHousing reserves the right to suspend or terminate this RFP at any time, reject any or all proposals received, and/or award all, a portion of, or none of the SHP funds and PBVs pursuant to this RFP. The total SHP funding and/or other funding resources awarded to an individual project will be determined by MaineHousing to ensure efficient, allowable, and appropriate use of all resources.

B. Eligible Applicants

Eligible applicants are:

- Not-for-profit organizations,
- For-profit housing developers,
- Community action agencies,
- Tribal Housing Authorities, and
- Public Housing Authorities

C. Eligible Uses

SHP eligible activities are:

- Acquisition and rehabilitation of unoccupied existing rental housing units that are converted to affordable rental housing,
- Adaptive re-use of existing buildings for affordable rental housing, and
- New construction of affordable rental housing units.

Eligible **affordable rental housing** includes “housing” as defined in 24 CFR 92.2, and further outlined in HUD Notice CPD-21-10, as including but not limited to “manufactured housing, single room occupancy (SRO) units, and permanent supportive housing. Emergency shelters, hotels, and motels (including those currently operating as non-congregate shelter), facilities such as nursing homes, residential treatment facilities, correctional facilities, halfway houses, and housing for students

or dormitories do not constitute housing in the SHP program. However, funds may be used to acquire and rehabilitate such structures into rental housing.

SHP-funded units must be rented to Very Low Income households (at or below 50% of area median income) for a minimum of 30 years unless a unit receives a PBV in which case it must be rented to Extremely Low Income households (at or below 30% of area median income). Displacement and relocation of tenants is prohibited.

All SHP-funded units must serve all households specified as Qualifying Populations:

- Homeless as defined by 24 CFR 91.5;
- At Risk of homelessness as defined by 24 CFR 91.5;
- Fleeing, or Attempting to Flee, Domestic Violence, Dating Violence, Sexual Assault, Stalking, or Human Trafficking as defined by HUD; and
- Other Populations where providing supportive services or assistance under section 212(a) of 42 U.S.C. 12742(a) would prevent the family's homelessness or would serve those with the greatest risk of housing instability.

Preferences may be given to:

1. Veterans Experiencing Homelessness
2. Chronically Homeless

If a preference is given, the SHP-funded units will still be required to serve all Qualifying Populations, subject to the preference.

D. Funding and Total Development Cost (TDC)

The total development cost of a project, which includes all costs associated with the project development as determined by MaineHousing, may not exceed a TDC index of \$350,000 per affordable rental unit and a TDC of \$175,000 per Single Room Occupancy (SRO) unit. Projects may not exceed 8 units. By default, MaineHousing's total contribution through all resources may not exceed the TDC index cap. The TDC index is the weighted average of the TDC per unit and the TDC per bedroom calculated as follows:

$$([2 \times \text{TDC}/\text{number of units}] + [\text{TDC}/\text{bedroom count}]) \text{ divided by } 3.$$

SHP funding will be in the form of either/both a 0% interest forgivable loan (HOME-ARP funds) or/and a 0% interest Deferred Loan (State funds). Any 0% interest Deferred Loan will be structured as a non-interest deferred payment loan with payment due on the earliest of (a) 30 years, (b) a sale, transfer, or assignment of the project, (c) the discontinuation of the intended public purpose, or (d) a default of the MaineHousing loan(s). All loans must be secured by a mortgage and security interest in the project and related personal property, the priority of which will be determined on a project-by-project basis. Projects may be required to use MaineHousing paying debt if sufficient cash flow is present or if additional funds are needed. Additionally, all reserve accounts will be held by MaineHousing.

If final scoring results in a tie, projects that pledge more outside sources of funding, thus reducing MaineHousing funding, will have priority.

E. Process.

Pre-Application. A completed **Supportive Housing Program Pre-Application** (Attachment A) must be received by MaineHousing no later than **Thursday, September 26, 2024.**

Please submit completed Pre-Applications electronically, and send any questions to Kelly Purington, Multifamily Underwriting Manager, at kpurington@mainehousing.org or (207) 626-4642.

1.

a) Site Review and Evaluation

After MaineHousing completes a site review and evaluation for a proposed project, the applicant may submit a full application. MaineHousing will determine whether the prospective project site meets the following criteria:

- 1) is adequate in size, exposure and contour to accommodate the number and type of units proposed;
- 2) has adequate utilities and streets to serve the site;
- 3) promotes greater choice of housing opportunities and avoids undue concentration of assisted persons in areas containing a high proportion of persons with low incomes;
- 4) is accessible to social, recreational, educational, commercial, and health facilities and services comparable to facilities and services found in neighborhoods consisting largely of unassisted similar units;
- 5) provides accessibility for persons with mobility impairments at a reasonable cost;
- 6) does not raise significant environmental concerns, and
- 7) is located where travel time and cost to places of employment is not excessive.

MaineHousing will notify the applicant whether the submitted Pre-Application appears to meet programmatic requirements. MaineHousing may make recommendations for the full application stage. MaineHousing may request additional information regarding development and operating costs for analysis at the Pre-Application stage.

b) Housing Quality Standards Inspection

Applicants proposing projects involving the acquisition and rehabilitation of existing residential units that will receive project-based Section 8 Housing Choice Vouchers or project-based HUD-Veterans Affairs Supportive Housing Vouchers must have a Housing Quality Standards (HQS) inspection performed by MaineHousing prior to submitting the full application. Applicants need to coordinate with real-estate brokers and property owners to ensure that the HQS inspector has full access to the interior and exterior of the entire building.

Proposed properties are not expected to meet HQS standards at the time of application. The HQS inspection conducted prior to application gauges the degree to which a particular

property fails to meet the HQS standards. Scoring will not be affected by the degree of non-compliance with HQS.

Projects involving acquisition and adaptive reuse of existing structures that were most recently used for non-residential purposes do not require an HQS inspection prior to application.

2. Full Application

Full applications must be received by MaineHousing no later than **Thursday, November 7, 2024**. Please submit completed Application documents electronically, and send any questions to Kelly Purington, Multifamily Underwriting Manager, at kpurington@mainehousing.org or (207) 626-4642.

3. Scoring and Award

- a) MaineHousing staff will review each application for completeness and eligibility. Incomplete or ineligible applications will not be processed further by MaineHousing and will be returned to the applicant.
- b) Development and operating costs will be evaluated to determine whether there is adequate capital to produce the project and fund ongoing operations as presented. A perspective project may be deemed ineligible based on this evaluation.
- c) MaineHousing staff will score and rank applications according to the selection criteria below and make funding recommendations to the MaineHousing Director.
- d) Applications for SHP funding with the highest scores will be awarded funding until it is completely awarded. However, if an applicant cannot make use of funds remaining after a higher scoring application is awarded funds, MaineHousing may award those remaining funds to a lower scoring application.
- e) The Director will make the final determination regarding applicants selected and amounts of awards.
- f) MaineHousing will issue a Notice to Proceed to the selected applicants. The Notice to Proceed will outline the development process, note key development activities, and identify MaineHousing staff assigned to the project. A Notice to Proceed is not a guarantee of funding.
- g) The applicant will acknowledge receipt of the Notice to Proceed by providing MaineHousing a timeline for the completion of the key development activities noted in the Notice to Proceed.

4. Development Underwriting

Applicants that receive a Notice to Proceed must provide documentation required to demonstrate that the proposed project is financially, legally, physically, and operationally viable and compliant with program requirements.

- a) MaineHousing staff will complete its due diligence process including an environmental review.
- b) Projects will be presented to the MaineHousing Loan Committee. The Committee will forward funding recommendations to the MaineHousing Director.
- c) Director-approved projects will be sent a term sheet including funding terms and conditions.
- d) MaineHousing will issue a closing agenda listing items needed for closing.
- e) MaineHousing will require a 30-year deferred forgivable promissory note without interest and/or a 30-year deferred promissory note without interest, a mortgage, a declaration of affordability covenants to be recorded at the applicable registry of deeds, and other documents and due diligence items in connection with the closing. Projects will be required to comply with affordability and other requirements for the 30-year term.

F. Required Documentation. The following documentation is **required** with the Full Application:

- 1) IRS 501(c)(3) tax-exemption determination letter (if applicable).
- 2) Corporate resolution demonstrating authority to undertake the project and incur the liability of financing.
- 3) Completed Small Project Pro Forma. (available under “Program Resources” at: mainehousing-small-project-pro-forma.xls (live.com))
- 4) Site control documentation.
- 5) A narrative that addresses each of the following items concerning the *applicant*:
 - a) legal name;
 - b) contact person, mailing address, phone, fax and e-mail address;
 - c) current legal status;
 - d) brief history, staffing levels, primary activities, geographic area of operations, previous relationship with MaineHousing, and constituency and clientele;
 - e) financial statements for the most recent fiscal year;
 - f) Taxpayer Identification Number (TIN); and
 - g) all real estate assets that are in default or foreclosure with a lending institution or that are otherwise at risk of substantive financial problems.

- 6) A narrative that addresses each of the following items concerning the *project*:
 - a) name (common and legal);
 - b) legal address;
 - c) detailed description of any existing structures, including size, design, construction materials, foundation, condition, estimated age, utilities, historic use(s), accessibility, parking, and observable environmental concerns;
 - d) non-residential space; and
 - e) all funding requested from MaineHousing and others.
- 7) Completed HUD Part 58 Environmental Review Checklist (Attachment B)
- 8) Either (i) a statement that neither the applicant, nor any principal or affiliate of the applicant, nor anyone who will be paid for work on the project has business ties, family relationships, or other close personal relationships with a current MaineHousing employee or commissioner or anyone who was a MaineHousing employee or commissioner within the past year; or (ii) a description of any such relationship.
- 9) A certification that if the applicant receives funding, the applicant will comply with all reporting requirements as determined by MaineHousing.
- 10) Documentation for each of the scoring criteria as described below.

G. Scoring Criteria.

When appropriate, scoring will be based on comparisons between applications received under this RFP. Documentation received after the time of application will not be used in the scoring unless MaineHousing requested the documentation.

1. Readiness (Max. 15 pts)

Readiness scoring will be based on:

- a) Evidence of site control, such as a deed, purchase and sale agreement, or option; evidence that site environmental issues will be mitigated; and a letter from the municipal code enforcement officer confirming that the proposed project complies with the local land use ordinances and is a permitted use within the applicable zone.
- b) Design and engineering documents prepared by contractors, engineers, and architects familiar with MaineHousing construction standards, including preliminary design,

proposed scopes of work, conceptual site plans, floor plans, typical building elevations, recent photographs, specifications, and detailed cost estimates.

- c) Development budget demonstrating viability, reasonableness, and competitiveness in the local market.
- d) Appropriateness of anticipated development schedule
- e) Applicant's history of successfully developing affordable or supportive housing in a timely fashion.

2. Development Team Capacity (Max. 10 pts.)

The development team may include consultants, design professionals, contractors and other real estate professionals. Development team capacity will be based on the following:

- a) financial, staffing and managerial capacity to develop housing projects within budget and timelines, including the current pipeline of projects in development;
- b) experience in owning, managing, and/or developing real estate assets;
- c) experience with public-sector housing development programs;
- d) experience addressing the service needs of persons experiencing homelessness and/or other vulnerable populations;
- e) partnerships with service providers developed in order to address the needs of the project's residents; and

3. Extent to which the applicant will provide housing and services to Qualifying Populations. (Max. 10 pts.)

Applicants will receive points for projects that serve the specific needs of Qualifying Populations. The degree of need for the Qualifying Populations served, and appropriateness of plans for providing services to tenants, will be evaluated. Points will be provided based on the extent to which the applicant will provide housing and services that includes assistance from other entities, including rental assistance or service contracts for the duration of the project reporting period, and is affordable across incomes at or below 50% of AMI.

Applicants will be awarded up to **8 points** for projects that will serve the specific housing needs of Qualified Populations. A description of the plans to provide services to tenants is required. The degree of need of the populations served and the appropriateness of plans for providing services to tenants will be evaluated.

Applicants will be awarded an additional **2 points** for projects that will serve either (i) veterans who are experiencing homelessness or (ii) those who are experiencing chronic homelessness, defined as residing in a homeless shelter or unsheltered for 180 days or more out of the last 365 days.

4. Additional Funding (Max. 7 pts.)

Applicants will be evaluated on the quantity, quality, and timeliness of leveraged funding (other than MaineHousing resources or MaineHousing-provided project-based rental assistance) committed to the proposed project. Evidence of commitment including sources and timing for all leveraged funds for development capital or operations is required. In-kind resources (e.g. donated land) will be considered. Applicants will receive points for project-based vouchers from entities other than MaineHousing. Evidence of any federal, state, or local project-based rental assistance committed to the project to ensure the rents are affordable to extremely low-income families is required regardless of the source.

5. Priority based upon underserved areas (Max. 5 pts.)

Applicants will receive points for providing evidence that demonstrates that the population who will live in the project is underserved in the area where the project is located.

6. MaineHousing Priorities (Max. 3 pts.)

Applicants must describe which of the following Consolidated Plan priorities will be addressed and how:

- a) improve and preserve the quality of housing;
- b) expand affordable housing opportunities; and/or
- c) help Maine people attain housing stability.

H. Construction Standards

Projects must be designed and constructed in accordance with MaineHousing's *Quality Standards and Procedures Manual* (located on the MaineHousing website at:

https://mainehousing.org/docs/default-source/development/construction-services/2024-quality-standards-manual/2024-quality-standards-and-procedures-manual-06032024.pdf?sfvrsn=4fc99e15_8

In addition to the standards, codes, and regulations covered in the MaineHousing manual, MaineHousing will require the following for rehabilitation of existing structures:

1. An estimate (based on age and condition) of the remaining useful life of the major building systems upon project completion, and
2. An adequate replacement reserves account for future physical needs during the affordability period, and
3. MaineHousing will conduct on-site inspections of rehabilitated units to identify deficiencies under HUD's Uniform Physical Condition Standards (UPCS) at the onset of all projects. Any such deficiencies must be addressed in the scope of work. Follow-up inspections will be conducted

after completion of the project to ensure all identified deficiencies have been, and are continually addressed. Please refer to **Attachment C: Uniform Physical Conditions Standards for Multifamily Housing** for more information.

Build America, Buy America Act (BABA) The Build America, Buy America Act (BABA) requires that all iron, steel, manufactured products, and construction materials used for federally funded infrastructure projects are produced in the United States, unless otherwise exempt or subject to an approved waiver. This requirement is known as the “Buy America Preference (BAP)” and the specific requirements are codified in 2 CFR § 184. For more information: <https://www.hudexchange.info/resource/6952/baba-quick-guide-rhp/>

Lead-based Paint. HUD’s lead-based paint regulations apply to housing assisted with SHP funds. The following is required for rehabilitation activities assisted with these funds:

1. Prior to the start of any rehabilitation work at a project site, a lead-based paint (LBP) risk assessment by a Lead Risk Assessor certified by the Maine Department of Environmental Protection (the Maine DEP), and paint testing on painted surfaces to be disturbed or replaced during rehabilitation activities, including housing units, common areas servicing the units and exterior painted surfaces, will be conducted in accordance with the Part 35 requirements and established protocols under the Maine DEP’s Lead Management Regulations – Chapter 424 (Maine DEP Lead Regulations), including a written report with findings, conclusions and recommendations.
2. If the LBP risk assessment indicates the presence of LBP, the Part 35 provisions for the level of federal rehabilitation assistance applicable to the project, and any related requirements of the Maine DEP Lead Regulations, will apply to the project.
3. Ongoing LBP maintenance and re-evaluation in accordance with §35.1355 will be required if LBP has been identified on a project site.

Lead-free Plumbing. HUD’s lead-free plumbing regulations apply to housing assisted with SHP funds. The following is required for rehabilitation activities assisted with SHP funds: All pipes, solder or flux used in the installation or repair of any residential project’s plumbing must be lead-free. “Lead free” means pipes and pipe fittings containing not more than 8% lead and solder and flux containing not more than 0.2% lead. The lead-free requirement does not apply to leaded joints necessary to repair cast iron pipes.

The lead-free plumbing requirement applies *only* to (i) new installations of pipes/solder/flux in a new construction project or in an existing building undergoing rehab and (ii) pipes/solder/flux used to repair or replace existing plumbing. So, in a rehab project, if plumbing installation, repair or replacement is not part of the work scope, the lead-free requirement does not apply to the project.

- 1) Plans and specifications for (a) all new construction projects and (b) all rehab projects involving the installation, replacement or repair of pipes, solder or flux in the plumbing system must expressly state that only pipes and pipe fittings containing not more than 8.0% lead and only solders and flux containing not more than 0.2% lead may be used and must reference the EPA’s lead-free plumbing rule at 40 CFR §143.12.

- 2) If the plans and specs or any later change order do not expressly set out this requirement, then, a certification from a licensed plumber that only lead-free plumbing (i.e., no more than 8% for pipes and pipe fittings and no more than 0.2% for solder and flux) was used will be required. Getting this certification will be a condition of paying one or more construction requisitions for the project.

I. Environmental Requirements and Choice-Limiting Actions

MaineHousing will conduct an environmental review (ER) of all projects receiving a Notice to Proceed under this RFP that have Section 8 Project-based vouchers (PBVs) and HOME-ARP funding. For projects using Section 8 PBVs and HOME-ARP funding, the ER is performed under the requirements of 24 CFR Part 58. Please see Attachment B for the Part 58 ER checklist.

When PBVs and HOME-ARP funding are used for a project, HUD's prohibition on taking choice-limiting actions applies to the project from the time that MaineHousing receives an application for HUD funding. In that case, prior to the completion of the Part 58 ER and environmental clearance for the project, the developer and all other participants in the development process for the project are prohibited from acquiring the project site and from committing or expending any source of funds, entering into binding contracts or commitments, or taking any physical action on the project site or in connection with the project. Participants in the development process for a project include the applicant for financing and a developer or sponsor of the project and any of their affiliates participating in the project, any construction manager, general contractor, or subcontractor, and any other consultant for the project. Other parties may also be participants in the development process for a project, depending on their role.

Choice limiting actions include, but are not limited to, the following activities. ***Please note:*** (a) the list below is not all-inclusive and (b) the age or physical condition of a building or other structure is not relevant in determining whether a choice-limiting action has occurred.

- Entering into, amending, extending or renewing an option agreement that does not comply with HUD's requirements
- Entering into, amending, extending or renewing a purchase and sale agreement
- Purchasing or leasing the project site, or any part of it
- Acquiring or granting an easement
- Entering into an Agreement to Enter into a Housing Assistance Payments Contract (AHAP) or a Housing Assistance Payments (HAP) Contract
- Purchasing or otherwise procuring construction materials for the project
- Going out to bid for any work relating to the project, including but not limited to construction, rehabilitation, demolition, or environmental remediation

- Demolition
- Environmental remediation, such as lead, mold, asbestos or soil remediation
- Utility or other infrastructure construction or installation, such as facilities for sewer, water, electric, gas, cable, Internet or telephone service, drainage, storm water management, and roads and sidewalks, etc.
- Excavation, earth removal, grading, paving, filling, clearing, dredging or draining
- Construction of new buildings or other structures and construction of any addition to an existing building
- Moving, rehabilitation, renovation, alteration, reconstruction, or replacement of existing buildings or parts of existing buildings
- Burying, replacing or relocating fuel tanks or converting a heating system on the project site or off-site
- Any other activity that has a physical effect on the land or buildings on the project site

To avoid the risk of losing funding for a project because of a violation of HUD's prohibition on taking choice-limiting actions, please contact MaineHousing if you have any questions on whether a contemplated action is allowed prior to environmental clearance.

J. Non-discrimination Notice

MaineHousing does not discriminate on the basis of race, color, religion, sex, sexual orientation, gender identity or expression, marital status, national origin, ancestry, physical or mental disability, age, familial status or receipt of public assistance in the admission or access to or treatment in its programs and activities. In employment, MaineHousing does not discriminate on the basis of race, color, religion, sex, sexual orientation, gender identity or expression, national origin, ancestry, age, physical or mental disability or genetic information. MaineHousing will provide appropriate communication auxiliary aids and services upon sufficient notice. MaineHousing will also provide this document in alternative formats upon sufficient notice.

MaineHousing has designated the following person responsible for coordinating compliance with applicable federal and state nondiscrimination requirements and addressing grievances: Lauren Bustard, Maine State Housing Authority, 26 Edison Drive, Augusta, Maine 04330, Telephone Number 1-800-452-4668 (voice in state only), (207) 626-4600 (voice) or Maine Relay 711.

Daniel Brennan, Director
August 23, 2024

ATTACHMENT A
2024 Supportive Housing Program Pre-Application

Applicant submissions to the MaineHousing 2024 Supportive Housing Program Request for Proposals must include this completed Pre-Application and be submitted prior to Thursday, September 26, 2024.

Please submit completed Pre-Applications electronically to Kelly Purington, Multifamily Underwriting Manager at kpurington@mainehousing.org, and send any questions to Don McGilvery, Construction Services Manager, at dmcgilvery@mainehousing.org or (207) 624-5721.

Upon receipt of the Pre-Application, MaineHousing will contact the applicant to schedule a Housing Quality Inspection if needed.

Please complete the following:

Contact Information

Applicant:

Contact Person:

Contact Phone Number:

Contact e-mail:

Project Location

Town/City:

Street Address:

Tax Map References:

Project Information

Please provide a narrative that also addresses the following:

- Project Name
- Number of units and bedroom configurations
- Type of activity (acquisition/rehabilitation/adaptive re-use, new construction)
- Number of accessible units that will be produced
- Number of on-site parking spaces
- Available utilities
- Local land use conformity, if known
- Summary of any known or suspected environmental concerns.

Attachments

Include the following attachments:

- a) Site location map (Google Maps or similar internet site location tool)
- b) Floor plans for existing buildings (may be found on broker's listing sheet or town tax assessment records)
- c) Proposed concept floor plans
- d) Conceptual building elevations indicating massing and fenestration
- e) Photographs of property from three angles at street access
- f) Gross square footage of the structure(s)
- g) Estimate of construction costs
- h) Estimate of construction duration

Submit any existing sketched or to-scale site plans indicating the approximate location of property lines, easements or encroachments, zoning setback lines, adjacent streets, points of vehicular entry and exit, proposed building footprints, proposed parking footprint (with spaces labeled), and capacities/sizes of existing utilities.

CHECKLIST FOR HUD PART 58 ENVIRONMENTAL REVIEW
Required for the use of federal funds

Area of Statutory or Regulatory Compliance		Yes/No	If Yes, Please Explain	Required Documentation (note: unless otherwise specified, documentation is required regardless of the Yes/No answer)
Historic	Is property known to be in or adjacent to a historic district or on the National Register of Historical Places?	<input type="checkbox"/> Yes <input type="checkbox"/> No		N/A
	Are there, or have there been, any building on property older than 50 years?	<input type="checkbox"/> Yes <input type="checkbox"/> No		N/A
	Are there any known archaeological sites on property?	<input type="checkbox"/> Yes <input type="checkbox"/> No		N/A

Area of Statutory or Regulatory Compliance		Yes/No	If Yes, Please Explain	Required Documentation (note: unless otherwise specified, documentation is required regardless of the Yes/No answer)
Flood Management	Is any of the property within a special flood hazard area?	<input type="checkbox"/> Yes <input type="checkbox"/> No		FIRM https://msc.fema.gov/portal/home Map must include: <ul style="list-style-type: none"> • Site location clearly marked • Flood Designation • FIRM Number and Effective Date
Wetlands	Are there any ponds, wetlands, streams, rivers, or coastlines on or near the property?	<input type="checkbox"/> Yes <input type="checkbox"/> No		National Wetland Inventory Map https://www.fws.gov/wetlands/data/Mapper.html <ul style="list-style-type: none"> • Site location clearly marked
Coastal Zone/ Coastal Barrier Resource	Is property located within a coastal management zone? (see https://www.maine.gov/dmr/mcp/about/coastal-zone-map.htm to determine if community is within a coastal management zone.)	<input type="checkbox"/> Yes <input type="checkbox"/> No		Coastal Barrier Mapper https://www.fws.gov/CBRA/ <ul style="list-style-type: none"> • Site location clearly marked

Area of Statutory or Regulatory Compliance		Yes/No	If Yes, Please Explain	Required Documentation (note: unless otherwise specified, documentation is required regardless of the Yes/No answer)
Sole Source Aquifers	Is the Site on one of these islands off the coast of Maine (Isleboro, Monhegan, North Haven, Vinalhaven)?	<input type="checkbox"/> Yes <input type="checkbox"/> No		N/A
Endangered Species	Will this project involve removal or trimming of trees greater than 3 inches in diameter?	<input type="checkbox"/> Yes <input type="checkbox"/> No		If yes, Site Plan showing planned tree work.
Wild and Scenic Rivers	Is the Site within 5 miles of the Allagash Wilderness Waterway?	<input type="checkbox"/> Yes <input type="checkbox"/> No		Map showing distance from the site to the Allagash Wilderness Waterway Map must include: <ul style="list-style-type: none"> • Site location clearly marked • Measurement to Allagash in miles
Farmlands	Is the Site within an agricultural zone or is it currently-farmed land?	<input type="checkbox"/> Yes <input type="checkbox"/> No		If yes, need soil survey. https://websoilsurvey.sc.egov.usda.gov/App/HomePage.htm <ul style="list-style-type: none"> • Site location clearly marked

Area of Statutory or Regulatory Compliance		Yes/No	If Yes, Please Explain	Required Documentation (note: unless otherwise specified, documentation is required regardless of the Yes/No answer)
Noise	Is Site located within 1,000 feet of a major highway?	<input type="checkbox"/> Yes <input type="checkbox"/> No		Map showing distance from the site to the closest highway. Map must include: <ul style="list-style-type: none"> • Site location clearly marked • Measurement to highway in miles
	Is Site located within 3,000 feet of a railroad?	<input type="checkbox"/> Yes <input type="checkbox"/> No		Map showing distance from the site to the closest railroad tracks. Map must include: <ul style="list-style-type: none"> • Site location clearly marked • Measurement to railroad tracks in miles
	If within 3,000 feet of a railroad, are the railroad tracks active?	<input type="checkbox"/> Yes <input type="checkbox"/> No		If inactive, provide documentation of inactive status.
Airports	Is the Site located within 5 miles of a civil airport? (Portland, Bangor, Augusta, Presque Isle, Knox County, Hancock County)	<input type="checkbox"/> Yes <input type="checkbox"/> No		Map showing distance from the site to the closest Civil Airport. Map must include: <ul style="list-style-type: none"> • Site location clearly marked • Measurement to airport in miles

Area of Statutory or Regulatory Compliance		Yes/No	If Yes, Please Explain	Required Documentation (note: unless otherwise specified, documentation is required regardless of the Yes/No answer)
Hazardous Operations	Are there any above-ground tanks within 1 mile of the Site containing petroleum products or chemicals of an explosive or flammable nature near the site?	<input type="checkbox"/> Yes <input type="checkbox"/> No		If yes, Site Plan showing location of tanks, measured distance to site property line and closest building, size of tank(s) and probable contents of tank(s).
Contamination and Toxic Substances	Is there a completed ASTM Phase 1 ESA	<input type="checkbox"/> Yes <input type="checkbox"/> No		Phase 1 ESA
Radon	Has Radon testing been completed?	<input type="checkbox"/> Yes <input type="checkbox"/> No		<p>If yes, attach test results.</p> <p>If no: for rehabilitation projects the Phase I must include radon testing; and for new construction radon testing will be required at the completion of the project. For new construction if radon test results covering the Project site or its county are available, attach results.</p>

ATTACHMENT C
Uniform Physical Conditions Standards for Multifamily Housing

		
SHP Rehab Standards Appendix A: Uniform Physical Condition Standards for Multifamily Housing Rehabilitation		
<i>NOTE: Deficiencies in bold italics are life-threatening and must be addressed immediately, if the housing is occupied.</i>		
Requirements for Site		
Inspectable Item	Observable Deficiency	Type and Degree of Deficiency that must be addressed
Fencing and Gates	Damaged/Falling/Leaning	Fence or gate is missing or damaged to the point it does not function as it should
	Holes	Hole in fence or gate is larger than 6 inches by 6 inches
	Missing Sections	An exterior fence, security fence or gate is missing a section which could threaten safety or security
Grounds	Erosion/Rutting Areas	Runoff has extensively displaced soils which has caused visible damage or potential failure to adjoining structures or threatens the safety of pedestrians or makes the grounds unusable
	Overgrown/Penetrating Vegetation	Vegetation has visibly damaged a component, area or system of the property or has made them unusable or unpassable
	Ponding/Site Drainage	There is an accumulation of more than 5 inches deep and/or a large section of the grounds-more than 20%-is unusable for its intended purpose due to poor drainage or ponding
Health & Safety	Air Quality - Sewer Odor Detected	Sewer odors that could pose a health risk if inhaled for prolonged periods
	<i>Air Quality - Propane/Natural Gas/Methane Gas Detected</i>	Strong propane, natural gas or methane odors that could pose a risk of explosion/ fire and/or pose a health risk if inhaled
	<i>Electrical Hazards - Exposed Wires/Open Panels</i>	Any exposed bare wires or openings in electrical panels (capped wires do not pose a risk)
	<i>Electrical Hazards - Water Leaks on/near Electrical Equipment</i>	Any water leaking, puddling or ponding on or immediately near any electrical apparatus that could pose a risk of fire, electrocution or explosion
	Flammable Materials - Improperly Stored	Flammable materials are improperly stored, causing the potential risk of fire or explosion
	Garbage and Debris - Outdoors	Too much garbage has gathered-more than the planned storage capacity, or garbage has gathered in

		an area not sanctioned for staging or storing garbage or debris
	Hazards – Other	Any general defects or hazards that pose risk of bodily injury
	Hazards - Sharp Edges	Any physical defect that could cause cutting or breaking of human skin or other bodily harm
	Hazards – Tripping	Any physical defect in walkways or other travelled area that poses a tripping risk
	Infestation – Insects	Evidence of infestation of insects-including roaches and ants-throughout a unit or room, food preparation or storage area or other area of building substantial enough to present a health and safety risk
	Infestation - Rats/Mice/Vermin	Evidence of rats or mice--sightings, rat or mouse holes, or droppings substantial enough to present a health and safety risk
Mailboxes/Project Signs	Mailbox Missing/Damaged	Mailbox cannot be locked or is missing
	Signs Damaged	The project sign is not legible or readable because of deterioration or damage
Parking Lots/Driveways/Roads	Cracks	Cracks that are large enough to affect traffic ability over more than 5% of the property's parking lots/driveways/roads or pose a safety hazard
	Ponding	3 inches or more of water has accumulated making 5% or more of a parking lot/driveway unusable or unsafe
	Potholes/Loose Material	Potholes or loose material that have made a parking lot/driveway unusable/unpassable for vehicles and/or pedestrians or could cause tripping or falling
	Settlement/Heaving	Settlement/heaving has made a parking lot/driveway unusable/unpassable or creates unsafe conditions for pedestrians and vehicles
Play Areas and Equipment	Damaged/Broken Equipment	More than 20% of the equipment is broken or does not operate as it should or any item that poses a safety risk
	Deteriorated Play Area Surface	More than 20% of the play surface area shows deterioration or the play surface area could cause tripping or falling and thus poses a safety risk
Refuse Disposal	Broken/Damaged Enclosure-Inadequate Outside Storage Space	A single wall or gate of the enclosure has collapsed or is leaning and in danger of falling or trash cannot be stored in the designated area because it is too small to store refuse until disposal
Retaining Walls	Damaged/Falling/Leaning	A retaining wall is damaged and does not function as it should or is a safety risk
Storm Drainage	Damaged/Obstructed	The system is partially or fully blocked by a large quantity of debris , causing backup into adjacent areas or runoffs into areas where runoff is not intended

Walkways/Steps	Broken/Missing Hand Railing	The hand rail is missing, damaged, loose, or otherwise unusable
	Cracks/Settlement/Heaving	Cracks, hinging/tilting or missing sections that affect traffic ability over more than 5% of the property's walkways/steps or any defect that creates a tripping or falling hazard
	Spalling/Exposed rebar	More than 5% of walkways have large areas of spalling--larger than 4 inches by 4 inches--that affect traffic

Requirements for Building Exterior		
Inspectable Item	Observable Deficiency	Type and Degree of Deficiency that must be addressed
Doors	Damaged Frames/Threshold/Lintels/Trim	Any door that is not functioning or cannot be locked because of damage to the frame, threshold, lintel or trim
	Damaged Hardware/Locks	Any door that does not function as it should or cannot be locked because of damage to the door's hardware
	Damaged Surface (Holes/Paint/Rusting/Glass)	Any door that has a hole or holes greater than 1 inch in diameter, significant peeling/cracking/no paint or rust that affects the integrity of the door surface, or broken/missing glass
	Damaged/Missing Screen/Storm/Security Door	Any screen door or storm door that is damaged or is missing screens or glass--shown by an empty frame or frames or any security door that is not functioning or is missing
	Deteriorated/Missing Caulking/Seals	The seals/caulking is missing on any entry door, or they are so damaged that they do not function as they should
	Missing Door	Any exterior door that is missing
Fire Escapes	<i>Blocked Egress/Ladders</i>	Stored items or other barriers restrict or block people from exiting
	Visibly Missing Components	Any of the functional components that affect the function of the fire escape--one section of a ladder or railing, for example--are missing
Foundations	Cracks/Gaps	Large cracks in foundation more than 3/8 inches wide by 3/8 inches deep by 6 inches long that present a possible sign of a serious structural problem, or opportunity for water penetration or sections of wall or floor that are broken apart
	Spalling/Exposed Rebar	Significant spalled areas affecting more than 10% of any foundation wall or any exposed reinforcing material--rebar or other
Health and Safety	<i>Electrical Hazards - Exposed Wires/Open Panels</i>	Any exposed bare wires or openings in electrical panels (capped wires do not pose a risk)
	<i>Electrical Hazards - Water Leaks on/near Electrical Equipment</i>	Any water leaking, puddling or ponding on or immediately near any electrical apparatus that could pose a risk of fire, electrocution or explosion
	<i>Emergency Fire Exits - Emergency/Fire Exits Blocked/Unusable</i>	The exit cannot be used or exit is limited because a door or window is nailed shut, a lock is broken, panic hardware is chained, debris, storage, or other conditions block exit
	Emergency Fire Exits - Missing Exit Signs	Exit signs that clearly identify all emergency exits are missing or there is no illumination in the area of the sign

	Flammable/Combustible Materials - Improperly Stored	Flammable materials are improperly stored, causing the potential risk of fire or explosion
	Garbage and Debris - Outdoors	Too much garbage has gathered-more than the planned storage capacity or garbage has gathered in an area not sanctioned for staging or storing garbage or debris
	Hazards – Other	Any general defects or hazards that pose risk of bodily injury
	Hazards - Sharp Edges	Any physical defect that could cause cutting or breaking of human skin or other bodily harm
	Hazards – Tripping	Any physical defect in walkways or other travelled area that poses a tripping risk
	Infestation – Insects	Evidence of infestation of insects-including roaches and ants-throughout a unit or room, food preparation or storage area or other area of building substantial enough to present a health and safety risk
	Infestation - Rats/Mice/Vermin	Evidence of rats or mice--sightings, rat or mouse holes, or droppings substantial enough to present a health and safety risk
Lighting	Broken Fixtures/Bulbs	10% or more of the lighting fixtures and bulbs surveyed are broken or missing
Roofs	Damaged Soffits/Fascia	Soffits or fascia that should be there are missing or so damaged that water penetration is visibly possible
	Damaged Vents	Vents are missing or so visibly damaged that further roof damage is possible
	Damaged/Clogged Drains	The drain is damaged or partially clogged with debris or the drain no longer functions
	Damaged/Torn Membrane/Missing Ballast	Ballast has shifted and no longer functions as it should or there is damage to the roof membrane that may result in water penetration
	Missing/Damaged Components from Downspout/Gutter	Drainage system components are missing or damaged causing visible damage to the roof, structure, exterior wall surface, or interior
	Missing/Damaged Shingles	Roofing shingles are missing or damaged enough to create a risk of water penetration
	Ponding	Evidence of standing water on roof, causing potential or visible damage to roof surface or underlying materials
Walls	Cracks/Gaps	Any large crack or gap that is more than 3/8 inches wide or deep and 6 inches long that presents a possible sign of serious structural problem or opportunity for water penetration
	Damaged Chimneys	Part or all of the chimney has visibly separated from the adjacent wall or there are cracked or missing pieces large enough to present a sign of chimney

		failure or there is a risk of falling pieces that could create a safety hazard
	Missing/Damaged Caulking/Mortar	Any exterior wall caulking or mortar deterioration that presents a risk of water penetration or risk of structural damage
	Missing Pieces/Holes/Spalling	Any exterior wall deterioration or holes of any size that present a risk of water penetration or risk of structural damage
	Stained/Peeling/Needs Paint	More than 20% of the exterior paint is peeling or paint is missing and siding surface is exposed thereby exposing siding to water penetration and deterioration
Windows	Broken/Missing/Cracked Panes	Any missing panes of glass or cracked panes of glass where the crack is either greater than 4" and/or substantial enough to impact the structural integrity of the window pane
	Damaged Sills/Frames/Lintels/Trim	Sills, frames, lintels, or trim are missing or damaged, exposing the inside of the surrounding walls and compromising its weather tightness
	Damaged/Missing Screens	Missing screens or screens with holes greater than 1 inch by 1 inch or tears greater than 2 inches in length
	Missing/Deteriorated Caulking/Seals/Glazing Compound	There are missing or deteriorated caulk or seals--with evidence of leaks or damage to the window or surrounding structure
	Peeling/Needs Paint	More than 20% of the exterior window paint is peeling or paint is missing and window frame surface is exposed thereby exposing window frame to water penetration and deterioration
	<i>Security Bars Prevent Egress</i>	The ability to exit through egress window is limited by security bars that do not function properly and, therefore, pose safety risks

Requirements for Building Systems		
Inspectable Item	Observable Deficiency	Type and Degree of Deficiency that must be addressed
Domestic Water	Leaking Central Water Supply	Leaking water from water supply line is observed
	Missing Pressure Relief Valve	There is no pressure relief valve or pressure relief valve does not drain down to the floor
	Rust/Corrosion on Heater Chimney	The water heater chimney shows evidence of flaking, discoloration, pitting, or crevices that may create holes that could allow toxic gases to leak from the chimney
	Water Supply Inoperable	There is no running water in any area of the building where there should be
Electrical System	Blocked Access/Improper Storage	One or more fixed items or items of sufficient size and weight impede access to the building system's electrical panel during an emergency
	Burnt Breakers	Carbon residue, melted breakers or arcing scars are evident
	Evidence of Leaks/Corrosion	Any corrosion that affects the condition of the components that carry current or any stains or rust on the interior of electrical enclosures, or any evidence of water leaks in the enclosure or hardware
	Frayed Wiring	Any nicks, abrasion, or fraying of the insulation that exposes any conducting wire
	Missing Breakers/Fuses	Any open and/or exposed breaker port
	Missing Outlet Covers	A cover is missing, which results in exposed visible electrical connections
Elevators	Not Operable	The elevator does not function at all or the elevator doors open when the cab is not there
Emergency Power	Auxiliary Lighting Inoperable (if applicable)	Auxiliary lighting does not function
Fire Protection	Missing Sprinkler Head	Any sprinkler head is missing, visibly disabled, painted over, blocked, or capped
	Missing/Damaged/Expired Extinguishers	There is missing, damaged or expired fire extinguisher in any area of the building where a fire extinguisher is required
Health & Safety	Air Quality - Mold and/or Mildew Observed	Evidence of mold or mildew is observed that is substantial enough to pose a health risk
	Air Quality - Propane/Natural Gas/Methane Gas Detected	Strong propane, natural gas or methane odors that could pose a risk of explosion/ fire and/or pose a health risk if inhaled
	Air Quality - Sewer Odor Detected	Sewer odors that could pose a health risk if inhaled for prolonged periods
	Electrical Hazards - Exposed Wires/Open Panels	Any exposed bare wires or openings in electrical panels (capped wires do not pose a risk)

	<i>Electrical Hazards - Water Leaks on/near Electrical Equipment</i>	Any water leaking, puddling or ponding on or immediately near any electrical apparatus that could pose a risk of fire, electrocution or explosion
	Elevator - Tripping	An elevator is misaligned with the floor by more than 3/4 of an inch. The elevator does not level as it should, which causes a tripping hazard
	<i>Emergency Fire Exits - Emergency/Fire Exits Blocked/Unusable</i>	The exit cannot be used or exit is limited because a door or window is nailed shut, a lock is broken, panic hardware is chained, debris, storage, or other conditions block exit
	Emergency Fire Exits - Missing Exit Signs	Exit signs that clearly identify all emergency exits are missing or there is no illumination in the area of the sign
	Flammable Materials - Improperly Stored	Flammable materials are improperly stored, causing the potential risk of fire or explosion
	Garbage and Debris - Indoors	Too much garbage has gathered-more than the planned storage capacity or garbage has gathered in an area not sanctioned for staging or storing garbage or debris
	Hazards - Other	Any general defects or hazards that pose risk of bodily injury
	Hazards - Sharp Edges	Any physical defect that could cause cutting or breaking of human skin or other bodily harm
	Hazards – Tripping Hazards	Any physical defect in walkways or other travelled area that poses a tripping risk
	Infestation - Insects	Evidence of infestation of insects-including roaches and ants-throughout a unit or room, food preparation or storage area or other area of building substantial enough to present a health and safety risk
	Infestation - Rats/Mice/Vermin	Evidence of rats or mice--sightings, rat or mouse holes, or droppings substantial enough to present a health and safety risk
HVAC	Boiler/Pump Leaks	Evidence of water or steam leaking in piping or pump packing
	Fuel Supply Leaks	Evidence of any amount of fuel leaking from the supply tank or piping
	General Rust/Corrosion	Significant formations of metal oxides, significant flaking, discoloration, or the development of a noticeable pit or crevice
	<i>Misaligned Chimney/Ventilation System</i>	A misalignment of an exhaust system on a combustion fuel-fired unit (oil, natural gas, propane, wood pellets etc.) that causes improper or dangerous venting of gases
Roof Exhaust System	Roof Exhaust Fan(s) Inoperable	The roof exhaust fan unit does not function

Sanitary System	Broken/Leaking/Clogged Pipes or Drains	Evidence of active leaks in or around the system components or evidence of standing water, puddles or ponding--a sign of leaks or clogged drains
	Missing Drain/Cleanout/Manhole Covers	A protective cover is missing

Requirements for Common Areas		
Inspectable Item	Observable Deficiency	Type and Degree of Deficiency that must be addressed
Includes the following: Basement/Garage/ Carport Closet/Utility/ Mechanical Community Room Halls/Corridors/ Stairs Kitchen Laundry Room Lobby Office Other Community Spaces Patio/Porch/ Balcony Restrooms Storage	Baluster/Side Railings – Damaged	Any damaged or missing balusters or side rails that limit the safe use of an area
	Cabinets - Missing/Damaged	10% or more of cabinet, doors, or shelves are missing or the laminate is separating
	Call for Aid - Inoperable	The system does not function as it should
	Ceiling - Holes/Missing Tiles/Panels/Cracks	Any holes in ceiling, missing tiles or large cracks wider than 1/4 of an inch and greater than 11 inches long
	Ceiling - Peeling/Needs Paint	More than 10% of ceiling has peeling paint or is missing paint
	Ceiling - Water Stains/Water Damage/Mold/Mildew	Evidence of a leak, mold or mildew--such as a darkened area--over a ceiling area greater than 1 foot square
	Countertops - Missing/Damaged	10% or more of the countertop working surface is missing, deteriorated, or damaged below the laminate ---not a sanitary surface to prepare food
	Dishwasher/Garbage Disposal – Inoperable	The dishwasher or garbage disposal does not operate as it should
	Doors - Damaged Frames/Threshold/Lintels/Trim	Any door that is not functioning or cannot be locked because of damage to the frame, threshold, lintel or trim
	Doors - Damaged Hardware/Locks	Any door that does not function as it should or cannot be locked because of damage to the door's hardware
	Doors - Damaged Surface (Holes/Paint/Rust/Glass)	Any door that has a hole or holes greater than 1 inch in diameter, significant peeling/cracking/no paint or rust that affects the integrity of the door surface, or broken/missing glass
	Doors - Damaged/Missing Screen/Storm/Security Door	Any screen door or storm door that is damaged or is missing screens or glass--shown by an empty frame or frames or any security door that is not functioning or is missing
	Doors - Deteriorated/Missing Seals (Entry Only)	The seals/caulking is missing on any entry door, or they are so damaged that they do not function as they should
	Doors - Missing Door	Any door that is missing that is required for the functional use of the space
	Dryer Vent - Missing/Damaged/Inoperable	The dryer vent is missing or it is not functioning because it is blocked. Dryer exhaust is not effectively vented to the outside

Electrical - Blocked Access to Electrical Panel	One or more fixed items or items of sufficient size and weight impede access to the building system's electrical panel during an emergency
Electrical - Burnt Breakers	Carbon residue, melted breakers or arcing scars are evident
Electrical - Evidence of Leaks/Corrosion	Any corrosion that affects the condition of the components that carry current or any stains or rust on the interior of electrical enclosures or any evidence of water leaks in the enclosure or hardware
Electrical - Frayed Wiring	Any nicks, abrasion, or fraying of the insulation that exposes any conducting wire
Electrical - Missing Breakers	Any open and/or exposed breaker port
<i>Electrical - Missing Covers</i>	A cover is missing, which results in exposed visible electrical connections
Floors - Bulging/Buckling	Any flooring that is bulging, buckling or sagging or a problem with alignment between flooring types
Floors - Floor Covering Damaged	More than 10% of floor covering has stains, surface burns, shallow cuts, small holes, tears, loose areas or exposed seams.
Floors - Missing Floor/Tiles	More than 5% of the flooring or tile flooring is missing
Floors - Peeling/Needs Paint	Any painted flooring that has peeling or missing paint on more than 10% of the surface
Floors - Rot/Deteriorated Subfloor	Any rotted or deteriorated subflooring greater than 6 inches by 6 inches
Floors - Water Stains/Water Damage/Mold/Mildew	Evidence of a leak, mold or mildew--such as a darkened area--covering a flooring area greater than 1 foot square
GFI - Inoperable	The GFI does not function
Graffiti	Any graffiti on any exposed surface greater than 6 inches by 6 inches
HVAC - Convection/Radiant Heat System Covers Missing/Damaged	Cover is missing or substantially damaged, allowing contact with heating/surface elements or associated fans
HVAC - General Rust/Corrosion	Significant formations of metal oxides, flaking, or discoloration--or a pit or crevice
HVAC - Inoperable	HVAC does not function. It does not provide the heating and cooling it should. The system does not respond when the controls are engaged
<i>HVAC - Misaligned Chimney/Ventilation System</i>	Any misalignment that may cause improper or dangerous venting of gases
HVAC - Noisy/Vibrating/Leaking	HVAC system shows signs of abnormal vibrations, other noise, or leaks when engaged
Lavatory Sink - Damaged/Missing	Sink has extensive discoloration or cracks in over 50% of the basin or the sink or associated hardware have failed or are missing and the sink can't be used

Lighting - Missing/Damaged/Inoperable Fixture	More than 10% of the permanent lighting fixtures are missing or damaged so they do not function
Mailbox - Missing/Damaged	The U.S Postal Service mailbox cannot be locked or is missing
Outlets/Switches/ Cover Plates - Missing/Broken	Outlet or switch is missing or a cover plate is missing or broken, resulting in exposed wiring
Pedestrian/Wheelchair Ramp	A walkway or ramp is damaged and cannot be used by people on foot, in wheelchair, or using walkers
Plumbing - Clogged Drains	Drain is substantially or completely clogged or has suffered extensive deterioration
Plumbing - Leaking Faucet/ Pipes	A steady leak that is adversely affecting the surrounding area
Range Hood /Exhaust Fans - Excessive Grease/Inoperable	A substantial accumulation of dirt or grease that threatens the free passage of air
Range/Stove - Missing/Damaged/ Inoperable	One or more burners are not functioning or doors or drawers are impeded or on gas ranges pilot is out and/or flames are not distributed equally or oven not functioning
Refrigerator - Damaged/Inoperable	The refrigerator has an extensive accumulation of ice or the seals around the doors are deteriorated or is damaged in any way which substantially impacts its performance
Restroom Cabinet - Damaged/Missing	Damaged or missing shelves, vanity top, drawers, or doors that are not functioning as they should for storage or their intended purpose
Shower/Tub - Damaged/ Missing	Any cracks in tub or shower through which water can pass or extensive discoloration over more than 20% of tub or shower surface or tub or shower is missing
Sink - Missing/Damaged	Any cracks in sink through which water can pass or extensive discoloration over more than 10% of the sink surface or sink is missing
Smoke Detector - Missing/Inoperable	Smoke detector is missing or does not function as it should
Stairs - Broken/Damaged/Missing Steps	A step is missing or broken
Stairs - Broken/Missing Hand Railing	The hand rail is missing, damaged, loose, or otherwise unusable
Ventilation/Exhaust System – Inoperable	exhaust fan is not functioning or window designed for ventilation does not open
Walls - Bulging/Buckling	Bulging, buckling or sagging walls or a lack of horizontal alignment
Walls - Damaged	Any hole in wall greater than 2 inches by 2 inches
Walls - Damaged/ Deteriorated Trim	10% or more of the wall trim is damaged

	Walls - Peeling/Needs Paint	10% or more of interior wall paint is peeling or missing
	Walls - Water Stains/Water Damage/Mold/Mildew	Evidence of a leak, mold or mildew--such as a common area--covering a wall area greater than 1 foot square
	Water Closet/Toilet - Damaged/Clogged/Missing	Fixture elements--seat, flush handle, cover etc.--are missing or damaged or the toilet seat is cracked or has a broken hinge or toilet cannot be flushed
	Windows - Cracked/Broken/Missing Panes	Any missing panes of glass or cracked panes of glass where the crack is either greater than 4" and/or substantial enough to impact the structural integrity of the window pane
	Windows - Damaged Window Sill	The sill is damaged enough to expose the inside of the surrounding walls and compromise its weather tightness
	Windows - Inoperable/Not Lockable	Any window that is not functioning or cannot be secured because lock is broken
	Windows - Missing/Deteriorated Caulking/Seals/Glazing Compound	There are missing or deteriorated caulk or seals--with evidence of leaks or damage to the window or surrounding structure
	Windows - Peeling/ Needs Paint	More than 10% of interior window paint is peeling or missing
	Windows - Security Bars Prevent Egress	The ability to exit through the window is limited by security bars that do not function properly and, therefore, pose safety risks
Health & Safety	Air Quality - Mold and/or Mildew Observed	Evidence of mold or mildew is observed that is substantial enough to pose a health risk
	Air Quality - Propane/Natural Gas/Methane Gas Detected	Strong propane, natural gas or methane odors that could pose a risk of explosion/ fire and/or pose a health risk if inhaled
	Air Quality - Sewer Odor Detected	Sewer odors that could pose a health risk if inhaled for prolonged periods
	Electrical Hazards - Exposed Wires/Open Panels	Any exposed bare wires or openings in electrical panels (capped wires do not pose a risk)
	Electrical Hazards - Water Leaks on/near Electrical Equipment	Any water leaking, puddling or ponding on or immediately near any electrical apparatus that could pose a risk of fire, electrocution or explosion
	Emergency Fire Exits - Emergency/Fire Exits Blocked/Unusable	The exit cannot be used or exit is limited because a door or window is nailed shut, a lock is broken, panic hardware is chained, debris, storage, or other conditions block exit
	Emergency Fire Exits - Missing Exit Signs	Exit signs that clearly identify all emergency exits are missing or there is no illumination in the area of the sign
	Flammable/Combustible Materials - Improperly Stored	Flammable or combustible materials are improperly stored, causing the potential risk of fire or explosion

	Garbage and Debris - Indoors	Too much garbage has gathered-more than the planned storage capacity or garbage has gathered in an area not sanctioned for staging or storing garbage or debris
	Garbage and Debris - Outdoors	Too much garbage has gathered-more than the planned storage capacity or garbage has gathered in an area not sanctioned for staging or storing garbage or debris
	Hazards - Other	Any general defects or hazards that pose risk of bodily injury
	Hazards - Sharp Edges	Any physical defect that could cause cutting or breaking of human skin or other bodily harm
	Hazards - Tripping	Any physical defect in walkways or other travelled area that poses a tripping risk
	Infestation - Insects	Evidence of infestation of insects-including roaches and ants-throughout a unit or room, food preparation or storage area or other area of building substantial enough to present a health and safety risk
	Infestation - Rats/Mice/Vermin	Evidence of rats or mice--sightings, rat or mouse holes, or droppings substantial enough to present a health and safety risk
Pools and Related Structures	Fencing - Damaged/Not Intact	Any damage that could compromise the integrity of the fence
Trash Collection Areas	Chutes - Damaged/Missing Components	Garbage has backed up into chutes, because the collection structure is missing or broken or compactors or components--chute, chute door, and other components--have failed

Requirements for Unit		
Inspectable Item	Observable Deficiency	Type and Degree of Deficiency that must be addressed
Bathroom	Bathroom Cabinets - Damaged/Missing	Damaged or missing shelves, vanity tops, drawers, or doors that are not functioning as they should for storage or their intended purpose
	Lavatory Sink - Damaged/Missing	Any cracks in sink through which water can pass or extensive discoloration over more than 10% of the sink surface or sink is missing
	Plumbing - Clogged Drains, Faucets	Drain or faucet is substantially or completely clogged or has suffered extensive deterioration
	Plumbing - Leaking Faucet/Pipes	A steady leak that is adversely affecting the surrounding area
	Shower/Tub - Damaged/Missing	Any cracks in tub or shower through which water can pass or extensive discoloration over more than 20% of tub or shower surface or tub or shower is missing
	Ventilation/Exhaust System – Absent/Inoperable	exhaust fan is not functioning or window designed for ventilation does not open
	Water Closet/Toilet - Damaged/Clogged/Missing	Fixture elements--seat, flush handle, cover etc.--are missing or damaged or the toilet seat is cracked or has a broken hinge or toilet cannot be flushed
Call-for-Aid (if applicable)	Inoperable	The system does not function as it should
Ceiling	Bulging/Buckling/Leaking	Bulging, buckling or sagging ceiling or problem with alignment
	Holes/Missing Tiles/Panels/Cracks	Any holes in ceiling, missing tiles or large cracks wider than 1/4 of an inch and greater than 6 inches long
	Peeling/Needs Paint	More than 10% of ceiling has peeling paint or is missing paint
	Water Stains/Water Damage/Mold/Mildew	Evidence of a leak, mold or mildew--such as a darkened area--over a ceiling area greater than 1 foot square
Doors	Damaged Frames/Threshold/Lintels/Trim	Any door that is not functioning or cannot be locked because of damage to the frame, threshold, lintel or trim
	Damaged Hardware/Locks	Any door that does not function as it should or cannot be locked because of damage to the door's hardware
	Damaged/Missing Screen/Storm/Security Door	Any screen door or storm door that is damaged or is missing screens or glass--shown by an empty frame or frames or any security door that is not functioning or is missing
	Damaged Surface - Holes/Paint/Rusting/Glass/Rotting	Any door that has a hole or holes greater than 1 inch in diameter, significant peeling/cracking/no paint or rust that affects the integrity of the door surface, or broken/missing glass

	Deteriorated/Missing Seals (Entry Only)	The seals/caulking is missing on any entry door, or they are so damaged that they do not function as they should
	Missing Door	Any door that is required for security (entry) or privacy (Bathroom) that is missing or any other unit door that is missing and is required for proper unit functionality
Electrical System	Blocked Access to Electrical Panel	One or more fixed items or items of sufficient size and weight impede access to the building system's electrical panel during an emergency
	Burnt Breakers	Carbon residue, melted breakers or arcing scars are evident
	Evidence of Leaks/Corrosion	Any corrosion that affects the condition of the components that carry current or any stains or rust on the interior of electrical enclosures or any evidence of water leaks in the enclosure or hardware
	Frayed Wiring	Any nicks, abrasion, or fraying of the insulation that exposes any conducting wire
	GFI - Inoperable	The GFI does not function
	Missing Breakers/Fuses	Any open and/or exposed breaker port
	<i>Missing Covers</i>	A cover is missing, which results in exposed visible electrical connections
Floors	Bulging/Buckling	Any flooring that is bulging, buckling or sagging or a problem with alignment between flooring types
	Floor Covering Damage	More than 10% of floor covering has stains, surface burns, shallow cuts, small holes, tears, loose areas or exposed seams.
	Missing Flooring Tiles	Any flooring or tile flooring that is missing
	Peeling/Needs Paint	Any painted flooring that has peeling or missing paint on more than 10% of the surface
	Rot/Deteriorated Subfloor	Any rotted or deteriorated subflooring greater than 6 inches by 6 inches
	Water Stains/Water Damage/Mold/Mildew	Evidence of a leak, mold or mildew--such as a darkened area--covering a flooring area greater than 1 foot square
Health & Safety	Air Quality - Mold and/or Mildew Observed	Evidence of mold or mildew is observed that is substantial enough to pose a health risk
	Air Quality - Sewer Odor Detected	Sewer odors that could pose a health risk if inhaled for prolonged periods
	<i>Air Quality - Propane/Natural Gas/Methane Gas Detected</i>	Strong propane, natural gas or methane odors that could pose a risk of explosion/ fire and/or pose a health risk if inhaled
	<i>Electrical Hazards - Exposed Wires/Open Panels</i>	Any exposed bare wires or openings in electrical panels (capped wires do not pose a risk)

	<i>Electrical Hazards - Water Leaks on/near Electrical Equipment</i>	Any water leaking, puddling or ponding on or immediately near any electrical apparatus that could pose a risk of fire, electrocution or explosion
	<i>Emergency Fire Exits - Emergency/Fire Exits Blocked/Unusable</i>	The exit cannot be used or exit is limited because a door or window is nailed shut, a lock is broken, panic hardware is chained, debris, storage, or other conditions block exit
	Emergency Fire Exits - Missing Exit Signs	Exit signs that clearly identify all emergency exits are missing or there is no illumination in the area of the sign
	Flammable Materials - Improperly Stored	Flammable materials are improperly stored, causing the potential risk of fire or explosion
	Garbage and Debris - Indoors	Too much garbage has gathered-more than the planned storage capacity or garbage has gathered in an area not sanctioned for staging or storing garbage or debris
	Garbage and Debris – Outdoors	Too much garbage has gathered-more than the planned storage capacity or garbage has gathered in an area not sanctioned for staging or storing garbage or debris
	Hazards - Other	Any general defects or hazards that pose risk of bodily injury
	Hazards - Sharp Edges	Any physical defect that could cause cutting or breaking of human skin or other bodily harm
	Hazards - Tripping	Any physical defect in walkways or other travelled area that poses a tripping risk
	Infestation - Insects	Evidence of infestation of insects-including roaches and ants-throughout a unit or room, food preparation or storage area or other area of building substantial enough to present a health and safety risk
	Infestation - Rats/Mice/Vermin	Evidence of rats or mice--sightings, rat or mouse holes, or droppings substantial enough to present a health and safety risk
Hot Water Heater	<i>Misaligned Chimney/Ventilation System</i>	Any misalignment that may cause improper or dangerous venting of gases
	Inoperable Unit/ Components	Hot water from hot water taps is no warmer than room temperature indicating hot water heater is not functioning properly
	Leaking Valves/Tanks/Pipes	There is evidence of active water leaks from hot water heater or related components
	Pressure Relief Valve Missing	There is no pressure relief valve or pressure relief valve does not drain down to the floor
	Rust/Corrosion	Significant formations of metal oxides, flaking, or discoloration--or a pit or crevice
HVAC System	Convection/Radiant Heat System Covers Missing/Damaged	Cover is missing or substantially damaged, allowing contact with heating/surface elements or associated fans

	Inoperable	HVAC does not function. It does not provide the heating and cooling it should. The system does not respond when the controls are engaged
	<i>Misaligned Chimney/Ventilation System</i>	Any misalignment that may cause improper or dangerous venting of gases
	Noisy/Vibrating/Leaking	The HVAC system shows signs of abnormal vibrations, other noise, or leaks when engaged
	Rust/Corrosion	Deterioration from rust or corrosion on the HVAC system in the dwelling unit
Kitchen	Cabinets - Missing/Damaged	10% or more of cabinet, doors, or shelves are missing or the laminate is separating
	Countertops - Missing/Damaged	10% or more of the countertop working surface is missing, deteriorated, or damaged below the laminate -- not a sanitary surface to prepare food
	Dishwasher/Garbage Disposal – Inoperable	The dishwasher or garbage disposal does not operate as it should
	Plumbing - Clogged Drains	Drain is substantially or completely clogged or has suffered extensive deterioration
	Plumbing - Leaking Faucet/Pipes	A steady leak that is adversely affecting the surrounding area
	Range Hood/Exhaust Fans - Excessive Grease/Inoperable	A substantial accumulation of dirt or grease that threatens the free passage of air
	Range/Stove - Missing/Damaged/Inoperable	One or more burners are not functioning or doors or drawers are impeded or on gas ranges pilot is out and/or flames are not distributed equally or oven not functioning
	Refrigerator-Missing/Damaged/Inoperable	The refrigerator has an extensive accumulation of ice or the seals around the doors are deteriorated or is damaged in any way which substantially impacts its performance
Laundry Area (Room)	Sink - Damaged/Missing	Any cracks in sink through which water can pass or extensive discoloration over more than 10% of the sink surface or sink is missing
	Dryer Vent - Missing/Damaged/Inoperable	The dryer vent is missing or it is not functioning because it is blocked. Dryer exhaust is not effectively vented to the outside
Lighting	Missing/Inoperable Fixture	A permanent light fixture is missing or not functioning, and no other switched light source is functioning in the room
Outlets/Switches	Missing	An outlet or switch is missing
	<i>Missing/Broken Cover Plates</i>	An outlet or switch has a broken cover plate over a junction box or the cover plate is missing
Patio/Porch/Balcony	Baluster/Side Railings Damaged	Any damaged or missing balusters or side rails that limit the safe use of an area
Smoke Detector	<i>Missing/Inoperable</i>	Smoke detector is missing or does not function as it should

Stairs	Broken/Damaged/Missing Steps	A step is missing or broken
	Broken/Missing Hand Railing	The hand rail is missing, damaged, loose, or otherwise unusable
Walls	Bulging/Buckling	Bulging, buckling or sagging walls or a lack of horizontal alignment
	Damaged	Any hole in wall greater than 2 inches by 2 inches
	Damaged/Deteriorated Trim	10% or more of the wall trim is damaged
	Peeling/Needs Paint	10% or more of interior wall paint is peeling or missing
	Water Stains/Water Damage/Mold/Mildew	Evidence of a leak, mold or mildew covering a wall area greater than 1 foot square
Windows	Cracked/Broken/Missing Panes	Any missing panes of glass or cracked panes of glass where the crack is either greater than 4" and/or substantial enough to impact the structural integrity of the window pane
	Damaged Window Sill	The sill is damaged enough to expose the inside of the surrounding walls and compromise its weather tightness
	Missing/Deteriorated Caulking/Seals/Glazing Compound	There are missing or deteriorated caulk or seals--with evidence of leaks or damage to the window or surrounding structure
	Inoperable/Not Lockable	Any window that is not functioning or cannot be secured because lock is broken
	Peeling/Needs Paint	More than 10% of interior window paint is peeling or missing
	<i>Security Bars Prevent Egress</i>	The ability to exit through the window is limited by security bars that do not function properly and, therefore, pose safety risks
