

How To Change The Order Of Field Columns in HEAP Cloud

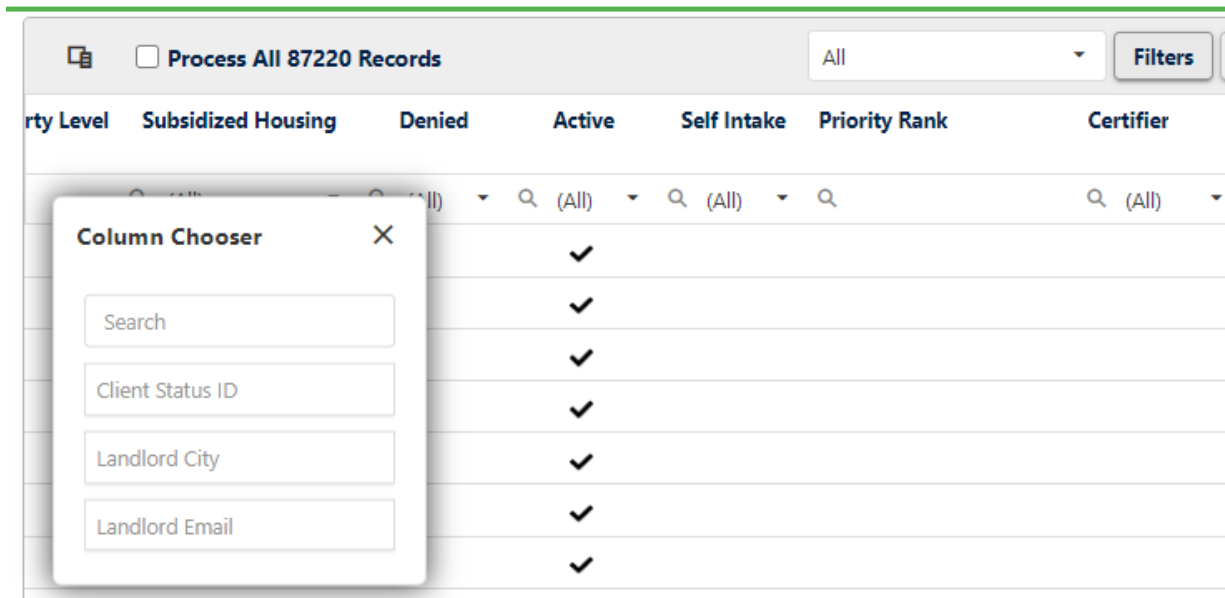

Select the column icon located in the upper left.

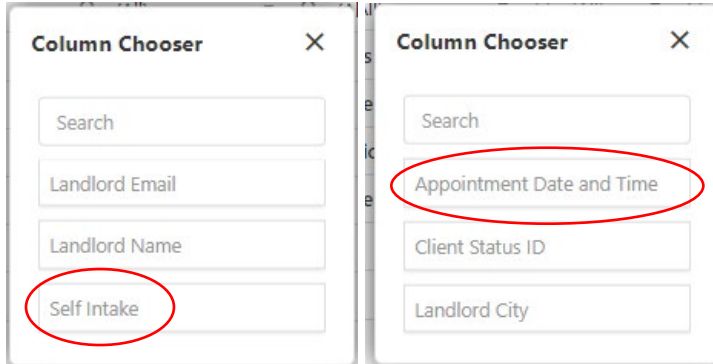

Column Chooser box will populate.

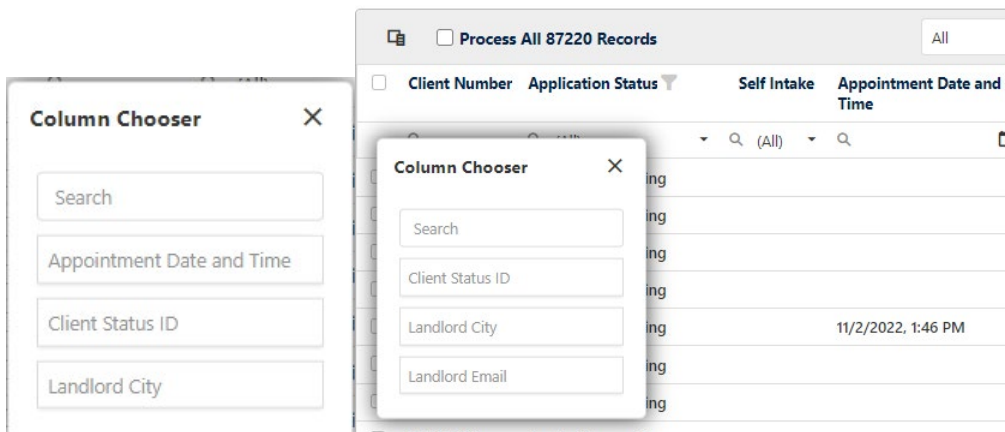

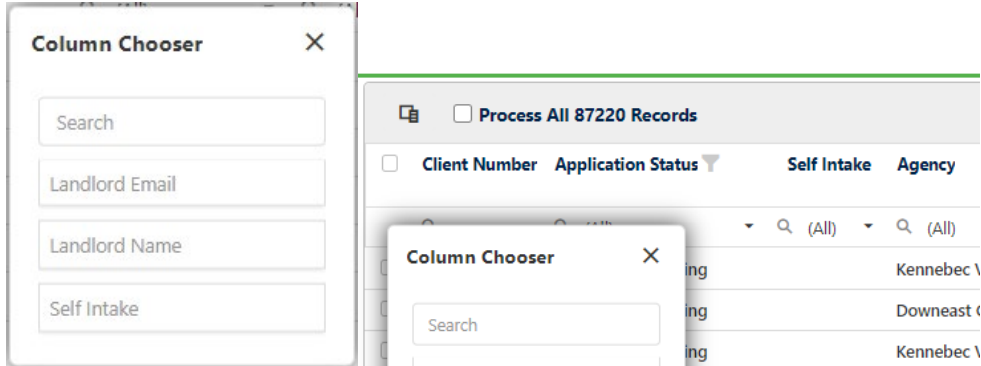

Scroll over to find the selected column fields you want to move.

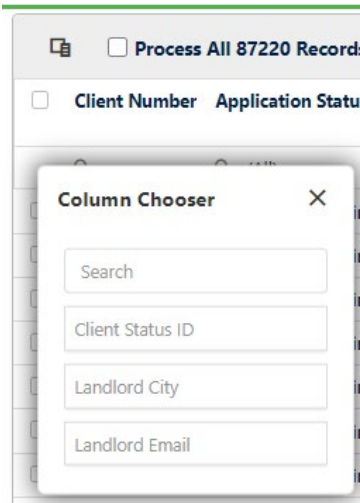

Click on the name of the fields that need to be moved and drag to inside the Column Chooser box.

Slide over to the area of where the fields need to be positioned. Click on the field and drag out of the column chooser box and unclick to where the field is to be positioned.

Once finished. Click X to close box.

Click on "Save Profile" to save changes of repositioning Field Columns.
