

By signing below, I certify that I have read the above statements and agree to the assurances. My signature also verifies this Property is not currently for sale, nor is it designated for foreclosure. I understand failure to provide complete, accurate information may result in me having to repay cost associated with the work.

I understand that the labor and materials for the work on the above Property will be provided to me at no cost. However, I further understand that if I sell the Property within one (1) year of the completion of the WAP improvements, I may be required to repay MaineHousing an amount equal to the cost of the WAP improvements within sixty (60) calendar days of the date of sale.

MAINE WEATHERIZATION PROGRAM (WAP)
RADON INFORMED CONSENT

INSTRUCTIONS: The *Radon Informed Consent* must be signed by applicants/property owners in consideration of any WAP services received.

Weatherization achieves energy and cost savings and improved comfort, health and safety of homes through a variety of home retrofit measures, including some which improve the airtightness of the building. According to the Department of Energy (DOE) sponsored study, "[Weatherization and Indoor Air Quality: Measured Impacts in Single-family Homes under the Weatherization Assistance Program](#)," there is a small risk of increased radon levels in homes when the building air tightness levels are improved. There is some evidence that the installation of continuous mechanical ventilation reduces radon levels in homes, and counteracts any radon increases that are due to improved building air tightness levels.

Precautionary Measures: All counties in Maine are identified as having moderate- to high-potential-radon levels.* Precautionary measures indicated below may be installed as part of weatherization work completed:

- Exposed dirt floors covered and sealed
- Floor/foundation penetrations sealed
- Open sump pit capped
- Crawl space venting inspected and/or improved
- Basement isolated (air sealed) from living space
- Other: _____

I am aware that weatherization work completed may affect levels of radon, and that mechanical ventilation may counteract any potential increases. I have received the Environmental Protection Agency's (EPA's) "A Citizen's Guide to Radon" and radon-related risks were discussed. By signing below, I acknowledge that I have read this informed consent form and have chosen to go forward with weatherization of my home.
