<b>Applicant (Owner):</b> _____	<b>Co-Applicant:</b> _____
<b>Property:</b> _____	<b>Contractor:</b> _____
<b>Unit #s:</b> _____	<b>Inspection Date:</b> _____

**TO:** Property Owner(s)

This letter is to certify that I inspected the above referenced Property relevant common areas and exterior areas for lead hazard reduction compliance on the above referenced Inspection Date and on that date those surfaces treated as specified in the Design Plan for the above referenced Property were found to be corrected and in compliance with HUD Guidelines and State of Maine Department of Environmental Protection criteria for clearance. A post hazard control work visual inspection and dust wipe samples were taken and found to be below these clearance criteria.

HUD Guidelines and State of Maine DEP Lead Management Rules do not require full abatement of lead-containing components within a dwelling. In many instances, interim controls will be used to mitigate lead paint hazards. This means that lead-based paint remains in your home and you should bear this in mind if you decide to perform any additional rehab to your home. Those components/surfaces/areas specified in the Design Plan will be corrected under MaineHousing's Lead Hazard Reduction Grant Program (Federal Lead) and/or Maine Lead-Paint Hazard Abatement Program (State Lead). A report detailing the sample results in conjunction with this Letter of Compliance are evidence that the work has been completed.

Sincerely,
