

**2024-25 NOFA for Winter Overnight Warming Shelters  
Questions & Answers  
7/30/24**

Q: I am curious if two non-profit organizations can collaborate with one of the organizations providing overnight warming shelter and the other providing a day time warming shelter. If not, is a day time warming shelter on its own an allowable project for this RFP?

A: A day center only is not an allowable project for this RFP, however two organizations could collaborate to provide day and overnight space.

Q: Do the two organizations who would apply have to occupy the same physical space or can they be in different locations in the city?

A: The spaces can be in two different locations, however there should be some indication in the narrative explaining how guests can get from one place to the other.

Q: If two organizations are awarded funding, does one of them get the full funding request and then pass it down to the other organization or would each organization get awarded money?

A: The grant award would go to one lead organization who would then have a subcontract agreement or MOU with the other organization and pass their funding along through that agreement. We would want to see a copy of the MOU/subcontract.
